

Flex Resistance Polyurethane Seals

Temperature Range: -40 degree C to +70 degree C.

Load: 50 MPA.

Features:

- Excellent Abrasion resistance.
- High Load Bearing capacity.
- Superior cut and tear resistance.
- Very good impact and shock resistance.
- Excellent Flex resistance.
- Very high tensile strength.
- Good Oil Resistance.

Very high elongation at high hardness for e.g. At 90 Shore A Hardness P.U. compound would show an elongation of 300-400%.

We have various raw materials in this category for different applications. Kindly contact us for your requirements. These seals are machined as per precision tolerances on CNC machines.
