

Application of 'Gujarat' Materials handling Equipment/Product:

**'Gujarat' Hydraulic Operated Pallet Truck (HOPT):**

1. Standard HOPT

2. With Skid Adaptor

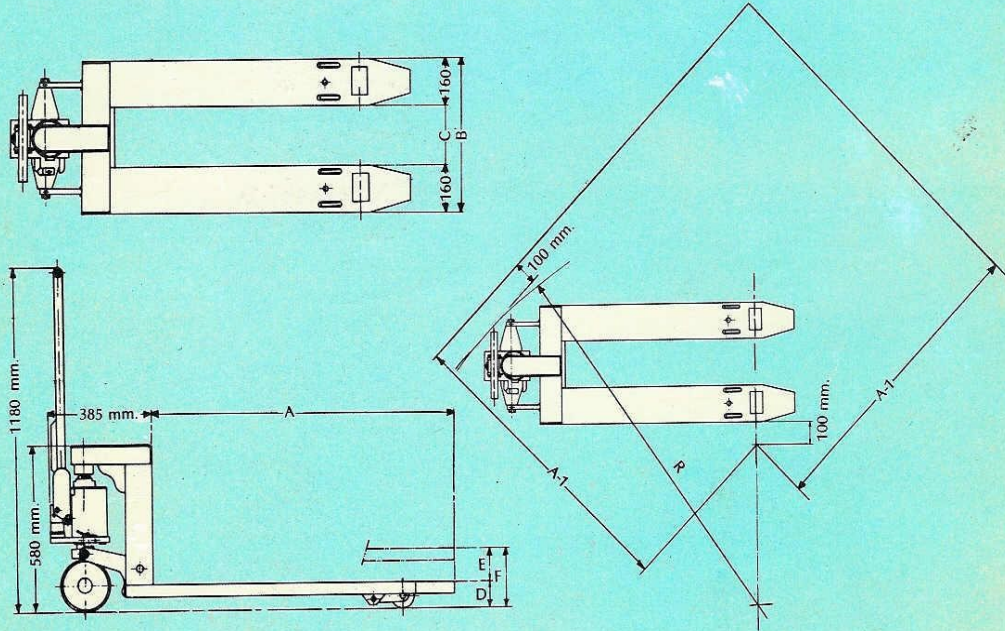

3. High Lift Pallet Truck

- Basically, HOPT is used for lifting Pallets (Wooden, Steel & Plastic). Fork goes within the under clearance provided in the pallet.
- HOPT gets raised to 205 mm from ground by the pumping action of the handle. This lifts the Pallet from the ground. Now you can take the pallet anywhere you want.
- Lowered Height of HOPT is 90-95 mm in a standard condition. Pallet under clearance is around 95-100 mm
- HOPT is available in 1200, 2000 and 3000 Kg capacity
- Fork length is available from 800 mm to 2200 mm
- **Variants:** HOPT can be customized in the following way:
  - Attachment of Skid Adaptor – for insulator handling – Insulator and Electrical companies
  - Beam Lifting
  - Barrel Lifting – different size barrels can be lifted in same pallet Truck
  - High Lift Pallet Truck – Available for lifting pallet to a height of 800 mm from ground level

# PALLET TRUCK
