

Ferrous Sulphate Heptahydrate

We offer ferrous sulphate heptahydrate, which is used as a fertilizer and as a feed additive in agriculture industry. It is also used as a mordant in dyeing wool, manufacturing of ink and as a substitute for aluminum sulfate in water purification. Ferrous Sulphate Heptahydrate is a blue-green, monoclinic crystals and generated as a by-product during the manufacturing of Titanium Dioxide or as a by-product of the pickling of steel.

Applications :

- Animal feed
- Water treatment
- Fertilizers
- Chemical manufacturing
- Hazardous waste treatment

Special Features :

- Free flowing
- Low content of insolubles
- Ability to make homogeneous mixtures
- Excellent storage stability in dry state
- Low content of heavy metals
