

TYRE NITROGEN GENERATORS

ICONTM

Application Areas:

1. Gas / Fuel Stations (Bunks),
2. Automobile Garages,
3. Transport Corporations,
4. Apartments,
5. Service Stations,
6. Industries & Labs

Why Use Nitrogen in Tyres?

1. Very Less Pressure Loss
2. Reduced Wheel Corrosion
3. Remains Stable at any Temperature
4. No Rust Formation
5. Tyre Runs Cooler
6. Helps Prevent uneven Wear & Tear
7. No need to check Tyre pressure frequently
8. Increased Tread Life
9. Increased Fuel Mileage
10. Saves Money & Time.

Accurate Tyre pressure ensures Proper Grip on the Road,
Better Mileage, and also extends the Life of the Tyre
