

‘Gujarat’ Mechanical Lift Truck:

- Lift Truck is basically a Mechanical Pallet Truck
- There is no hydraulic pump. Lifting of the truck is done by the handle, which acts as the lever
- The turning radius is lesser than the HOPT. Hence it is used in confined spaces, stores, warehouses, paper industry, engineering units etc
- Due to its Robustness, it has found application in the Engineering Industry, Paper Industry, Warehouse Management, Airports, Automobile Industry etc
- Capacity: 600 Kg and 1000 Kg
