

## Tray Driers

Triple walled chamber, mounted on a steady angle iron frame with opening in the front. Inner made of stainless steel and outer made of heavy cold rolled mild steel sheets with powder coating finish. Brackets to support the heavily laden drying trays are provided on the sides of the inner wall.

Heating is achieved by strip type heaters and the temperature range from 50 degree to 250 degree. Temperature is controlled by a digital temperature controller with an accuracy of  $\pm 1^{\circ}\text{C}$ .

Ventilation is provided with an adjustable opening at the top to exhaust fumes or vapours produced during processing. Air circulation fan assembly 2 Nos., driven by suitable motor is incorporated in the unit for maintaining uniform temperature. The instrument will be supplied with Stainless steel trolley 2 Nos.,

Sl. No	Size	Watts	Trays
1.	38"H x 18"D x 34"W	5KW	12
2.	38"H x 18"D x 68"W	8KW	24
