Physical and chemical properties:

- Reddish brown color.
- High tannin content.
- Excellent tanning properties.
- Uniform quality.
- Not dusty powerful astringent.
- Easily soluble in cold water.

Property:

- Moisture content: 10-20%
- Ash content at 85°C: 4-6%
- Tannin content: 50-60%
- Specific gravity @ 20°C: 1.54 g/cc.
- Bulk Density: 0.71 gms/ml.
- Solubility in water: 800 g/liter.
- Viscosity mPa.s @ 30°C-400g/l solution: 20 pass.

Application:

- For leather industry for tanning
