INTRODUCTION

Due to various reasons, if the body of an Individual absorbs too much iron, which cannot be excreted, it reaches to the toxic levels and gets deposited in tissues of major organs such as the Liver, Heart, Pituitary, Thyroid, Pancreas, Lungs, and Synovium (Joints). These overburdened organs cease to function properly and eventually become diseased. Therefore, undiagnosed and untreated HHC can develop into diseases such as diabetes, heart trouble, arthritis, liver disease, neurological problems, depression, impotence, infertility, and cancer.

Such iron overloading diseases (also termed as Hemosiderosis and Hemochromatosis) may be subdivided into 2 types:

1. Acquired Iron Overload occurs when one obtains excessive amounts of iron from repeated exposure through supplementation, diet, iron shots, and blood transfusions. When iron overload is acquired by oral or injected means, it affects the entire body. One can accumulate dangerously high levels of iron by accidental ingestion which usual occurs with young children who get iron pills prescribed for their mothers; these children can get very sick and can even die from iron poisoning.
2. Secondary Iron Overload: It is very difficult task to manage various anemias like Sickle-Cell Anemia, Juvenile Hemochromatosis, African Siderosis, Thalassemia, Porphyria Cutanea Tarda, Sideroblastic Anemia, Iron-Deficiency Anemia, and Anemia of Chronic Disease. Such patients need blood transfusions at regular interval which improves the quality of life and prolongs survival but unfortunately a consequence of chronic transfusion therapy causes Secondary Iron Overload, which adversely affects the function of the heart, the liver and other organs.

GENERAL SYMPTOMS:

1. Abdominal Pain,
2. Chest Pain,
3. Chronic Fatigue,
4. Shortness of Breath,
5. Arrhythmia, § Enlargement of Spleen,
6. Hypothyroidism, § Weight Loss,
7. Jaundice &/or Elevated Liver Enzymes,

8. Arthritic Pain In Joints, § Loss of Libido (Sex Drive) or Impotence,
9. Elevated Blood Sugar,
10. Amenorrhea (Premature Cessation Of Menstrual Cycle),
11. Depression,
12. Changes in Skin Color etc.

HOW TO DIAGNOSE IT:

Serum Normal Iron overloading diseases

Iron: (mug/dL)

(mumol/L) 60-180 180-300

11-32 32-54

Ferritin:

Males (ng/mL; mug/L) 20-200 300-3000

Females (ng/mL; mug/L) 15-150 250-3000

Transferrin saturation (%) 20-50 55-100

Treatment Procedure:

Internal Ayurvedic Medicine. Result oriented and clinically proven 100% Ayurvedic standardized herbal medicine. The clinical trial of this medicine has been done successfully on more than 100 patients. The polyherbal medicine is free from adversity

QUALITY ASSURANCE

We know that our treatment deals with human lives and therefore with utmost faith in nature, we believe in only highest quality standard herbs by taking individual body constitution into consideration and under strict quality processes. Which are non- hazardous & non-toxic without any side effects?

SHIPPING

We ship world wide to most of the countries through DHL COURIERES by providing door step delivery.

PAYMENT METHOD

You may have online purchase from our site www.dotbenmoonpharmadotcom. We offer PAYPAL payment gateway, the oldest and safest in the business from years.

DELIVERY TIME

Within 10 days
