

## Zinc Sulphate Mono hydrate (Spray Drying Material)

Zinc Sulphate 33% Zn Feed & Agriculture. Zinc sulphate mono hydrate is a colorless crystalline, water-soluble chemical compound. These are prepared by reacting zinc with light aqueous sulfuric acid. It is properly packed in hdpe bags with liner so that its purity and efficacy is maintained till the very end. **Note:** Zinc Sulphate the Products are used in Micronutrition and Veterinary Products.

### Applications:

- For agricultural products
- Animal feed
- Feed grade minerals
- Micronutrient product
- Feed premix plant

FORMULA	ZnSo4.
Appearance	White Free Flowing Powder
Zinc Sulphate	98
Zinc	33-36%
Matter	Insoluble In Water: 0.2
Iron	100 PPM.
Arsenic	0.1 PPM
Lead	2.5 PPM.
Cadium	5 PPM.
Magnesium	Nil.
Copper	Nil.
Aluminium	4 PPM.
Alkalies & Alkalies Earth Metals	50 PPM.
Chlorides	35 PPM.
PH	4.5
