

Rubber Sheets

Natural Rubber/ SBR Sheets:

- Very good mechanical properties
- Good weather resistance
- Fair to good alkali and acid resistance
- Affected by oils, fats, fuels and oxidizing acids.

EPDM Rubber Sheets:

- Excellent weather, ozone and steam resistance.
- Moderate resistance to acids.

Chloroprene (Neoprene) Rubber Sheets:

- Excellent weather resistance
- Good mechanical properties
- Moderately resistant to oils and fats.

Viton Rubber Sheets

- Excellent resistant to ozone, oxygen, mineral, oil, synthetic hydraulic fluids, fuels, solvents & chemicals.
- Low permeability to gas, air and high dielectric strengths.
- Available in White & Black colour.
- High resistant to temperature(+300° to - 20°).

Food Grade Rubber Sheets:

- Used for gaskets, washers and other items in contact with edible products.

Abrasion Resistant Sheets:

- Highly resistant to abrasion and corrosion.
- Ideally suited as skirt boards, and for pits and mines and other heavy duty applications.

Diaphragm Rubber Sheets:

- Nitrile sheets with nylon insertion used as diaphragms for oil, LPG & solvent resistant applications
