Ensure sustained satisfaction to all our customers, patients & clients. Striving for Global Wellness through Herbal Health Care Products.

DEFINITION

Blood pressure is the force of blood pushing against blood vessel walls. The heart pumps blood into the arteries (blood vessels), which carry the blood throughout the body. High blood pressure, also called hypertension, is dangerous because it makes the heart work harder to pump blood to the body and it contributes to hardening of the arteries or atherosclerosis and the development of heart failure.
